

Motor-powered turn track WD 180° L-R

Motor-powered turn 180° track made entirely from stainless steel. Frame made from non-corrosive, 30x30 mm square tubing with adjustable feet. Suitable for all 50x50 cm washing baskets. The design means that the baskets are loaded from left to right using a plastic drive chain. Equipped with an emergency stop.

The turn track is connected to the machine's outfeed side, either directly to the machine or to a straight section placed between the machine and the track. The turn track can also be placed on the infeed side.
