

Vertical freezer display

Metos Luxor Slim KG6V

white

Metos Luxor Classic Slim KG6V is an elegant, innovative and adaptable vertical slim freezer display that creates an attractive and exclusive environment for the products sold. In addition to the walls and shelves that are made of hardened glass, the thin rack shelves that are powered with static cooling allow for an unobstructed view of the products inside the display.

At only 60 cm wide, the Metos Luxor Classic Slim KG6V vertical freezer display is intended for storing of frozen confectionery products and ice-cream. Equipped with five (450x460 mm) rack shelves, one glass shelf, shade adjustable LED-lights and a right hinged door, the vertical cold display creates a clear and light frame for products. The display's cold area can be set to between -25°C...-15°C. The display has a static cooler, which distributes the air evenly across the whole area.

The display's frame is covered with white (RAL 9010) silk printing. The lower part of the frame masterfully hides the wheels, enabling the easy movability of the display. The display has an automatic melting and water evaporating system.

- five cold rack shelves (450x460 mm) and a glass shelf (450x420 mm)
- cold area -25°...-15°C
- right hinged door
